

WE'RE HIRING!

At Traggert, we are enhancing the manufacturing industry with our assistant system, a unique combination of a mobile Flutter App and BLE IoT technology. It is designed to significantly enhance the work life of manufacturing personnel. Our team, driven by a passion for practical innovation and effectiveness, is committed to creating solutions that genuinely make a difference in the day-to-day operations of manufacturing workers.

Flutter Development - Working Student (m/w/d) (Full-Remote possible)

What We are Looking for

- Solid experience in at least one programming language.
- Preferably, hands-on experience with Flutter App development.
- A quick learner, enthusiastic about tackling new challenges in a dynamic environment.

Your Responsibilities

- Develop advanced features for our app, focusing on personalization, collaboration, and IoT integration.
- Work collaboratively with the team to understand and define customer requirements.
- Participate actively in all phases of the development lifecycle, from concept to deployment.

Your Benefits

- Gain comprehensive experience in the full app development lifecycle
- Be part of a young, dynamic, and experienced team
- Receive competitive compensation

More

- Flexible work arrangements: Full-Remote, Hybrid, or On-Site
- Work hours that respect your academic commitments, especially around exam times
- An inclusive, tolerant, and open-minded work environment

Send your CV & Transcript of grades to: join@traggert.com! No letter of motivation needed
